

Template for an abstract to QUIET 2017

B. Author¹ and D. Co-author^{1,2}

¹Affiliation of both authors

²Additional affiliation of the co-author

This is a template for an abstract for the QUIET 2017 workshop.

We kindly ask you not to use any new definitions or packages, except for possible additional language options to the babel package.

Since we are going to combine all contributions into a single file we kindly ask you to use the following scheme for labels and file names. All labels (e.g., to your references (cf. [1])) and file names (e.g., images or bibtex files) must start with first three letters of the surname of the (co-)author who submits the contribution, followed by an underscore “_”. Here we use **Aut_** for this purpose.

The text *must* not exceed one page with font and margins fixed in this template. It may contain tables (cf. Table 1) and pictures (cf. Figure 1).

Figure 1: Figure.

(1,1)	(1,2)
(2,1)	(2,2)

Table 1: Table.

Abstract should be submitted on the QUIET 2017 website <http://indico.sissa.it/e/quiet2017>; please create an archive containing the tex file of the abstract and required additional files (bibtex files, images, etc.), if any. Deadlines are listed in the submission page. Please contact quiet2017@sissa.it for any additional query related to abstract submission.
