

# **Trieste Encounters in Cognitive Sciences: timing and temporal cognition**

Monday 12 June 2017 - Friday 16 June 2017

SiSSA Main Campus

## **Book of Abstracts**

# Contents

A general theory of intertemporal decision making and the perception of time . . . . .	1
Adaptive processes in time and timing . . . . .	1
Circuits and mechanisms for temporal categorization . . . . .	1
Circuits and mechanisms for temporal categorization . . . . .	1
Continuative Timing: A New Theory to Explain Timing in Everyday Life . . . . .	1
Neural oscillations: time metrics for information processing in the brain . . . . .	1
Neural signatures of time... Really? . . . . .	1
Students presentation . . . . .	1
Students presentation . . . . .	2
Temporal channels as revealed by human psychophysics . . . . .	2
Temporal channels as revealed by human psychophysics . . . . .	2
Temporal cognition and neural oscillation . . . . .	2
Temporal cognition and neural oscillation . . . . .	2
The conscious time arrow in our mind . . . . .	2
The neural genesis of reward timing . . . . .	2
The time scales of neural population coding in sensation and perceptual decisions . . . . .	3
Time perception without clocks . . . . .	3
Welcome and Introduction . . . . .	3
Welcome and Introduction . . . . .	3

21

**A general theory of intertemporal decision making and the perception of time**

22

**Adaptive processes in time and timing**

33

**Circuits and mechanisms for temporal categorization**

32

**Circuits and mechanisms for temporal categorization**

31

**Continuative Timing: A New Theory to Explain Timing in Everyday Life**

17

**Neural oscillations: time metrics for information processing in the brain**

30

**Neural signatures of time... Really?**

27

**Students presentation**

23

**Students presentation**

26

**Temporal channels as revealed by human psychophysics**

29

**Temporal channels as revealed by human psychophysics**

25

**Temporal cognition and neural oscillation**

28

**Temporal cognition and neural oscillation**

20

**The conscious time arrow in our mind**

18

**The neural genesis of reward timing**

19

**The time scales of neural population coding in sensation and perceptual decisions**

24

**Time perception without clocks**

16

**Welcome and Introduction**

15

**Welcome and Introduction**
