

AIP Sperimentale 2024, 30° Congresso annuale

Monday, September 23, 2024

Mini-talks: ACTION & MOTION (1) - Aula Genovesi (3:30 PM - 5:00 PM)

-Conveners: MODERATORE: Federica Bencivenga

| time | [id] title | presenter |
|---------|--|-------------------------|
| 3:30 PM | [92] Dual-task effects on sustained attention and inhibitory control in a partial sleep deprivation paradigm | GIANELLI, Claudia |
| 3:40 PM | [158] When self-agency goes wrong: the case of schizophrenia. | ROSSETTI, Ileana |
| 3:50 PM | [198] Motor inhibition in joint action with natural and artificial agents | SIRI, Giulia |
| 4:00 PM | [306] Action prediction is facilitated by contextual cues in children with cerebral palsy but not in children with developmental coordination disorder | BOSCAROL, Sara |
| 4:10 PM | [344] Assessing the effects of transcutaneous Vagus Nerve Stimulation on motor activation and inhibition | FINISGUERRA, Alessandra |
| 4:20 PM | [374] The impact of 'motor distance' on action understanding: how motor similarities guide our comprehension of others | Ms MARONATI, Camilla |
| 4:30 PM | [392] A tale of two limbs: Towards a unified motor fingerprint across whole-body movements | Dr MANUELLO, Jordi |
| 4:40 PM | [399] Unravelling the role of the insula in apraxia: A systematic review of VLSM studies in stroke patients | SCUDERI, Angelica |
| 4:50 PM | [411] Exploring the effects of transcutaneous Vagus Nerve Stimulation on long-term potentiation induced by paired associative stimulation. | Dr TURCHI, Letizia |
