## Decorated character varieties, Painlevé equations and quantization - Second Lecture

Tuesday, June 20, 2017 3:00 PM (50 minutes)

## Abstract

Colliding holes in orientable non compact Riemann surfaces. Bordered cusps, Teichmuller theory for Riemann surfaces with bordered cusps. Example: confluence of the Painlevé equations as hole collision. Quantisation.

Presenter: MAZZOCCO, Marta (University of Loughborough, UK)
