LISA Data Challenges: Status and future prospects

Tuesday, January 14, 2020 2:15 PM (45 minutes)

The LISA Data Challenges (LDC) where established as a common ground with the aim of engaging the community to the open LISA data analysis questions. Since the first LDC, a lot of experience has been gained, and significant progress has been achieved. In this talk I will review this progress, and I will present the purpose and individual goals of the current LDCs. The status and future prospects will be discussed, and a small tutorial on the software usage will be given as well.

Presenter: KARNESIS, Nikos

Session Classification: Afternoon session
