

The Personal Computer is dead. Long life the Personal HPC.

Thursday, February 25, 2016 2:00 PM (30 minutes)

The exponential growth of computation is very close to an evolutionary step in the way we use HPC extending and expanding the class of problems they can address. The ongoing digital transformation and software containerization are enabling the use of HPC s in most of the fields of human activities. The new digital hyperconnected world need HPC scientists and not just only Data Scientist.

Presenter: SIAGRI, Roberto (Eurotech spa)

Session Classification: HPC in industry: some regional examples
