

Theory: The quantum states of the universe in tomographic form

Monday, September 4, 2023 2:15 PM (15 minutes)

In this talk I present some new results in the program of formulating Quantum Cosmology in a tomographic representation. In particular I show new solutions of the Wheeler-De Witt equation recently obtained together with the correspondent tomograms.

Presenter: STORNAIOLO, Cosimo (INFN-Sezione di Napoli)

Session Classification: Parallel Sessions
